

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, C, C#, HTML/CSS, MATLAB, BASH/Linux, LaTeX, Verilog, Object Oriented Design Principles, Unit Testing

EDUCATION

University of Warwick Sept 2018 – July 2021

Computer Systems Engineering (BEng) 2:1

Forest School Sept 2011 – July 2018

A Levels (A*A*A*AA): Maths, Physics, Extended Project Qualification (Full Marks), Computer Science, Further Maths. 10 GCSEs including Maths, English, and Sciences (5A*s, 5As)

PROJECTS

AI that competes in Super Smash Bros. Melee (3rd Year Project)

- Built an **Artificial Intelligence** system that plays the game at human expert level
- Developed a suite of **Unit tests**, tested different AI frameworks to implement in **Python**

Derivative trading system

- Programmed using **react.js**. Developed the user-interface.
- This project required **communication**, **organisation**, and **management skills** to ensure a healthy development cycle and an excellent interface between **front and back-end systems**.

Space Invaders designed on an FPGA

- Programmed a Space-Invaders variant using Verilog for an Nexys4DDR FPGA Board.
- Clock synchronisation, pixel management, image translation, look-up table manipulation.

EXPERIENCE

Data Operations Manager For SAMAFAL July 2024 – Present

- Managed Data Processing and Storage Optimization for the **GLA Mayor of London Program**
 - Developed programs** to streamline the data entry process for student records.
 - Trained employees to use the **government-provided data entry software: GLA-OPS**.
 - Created a program** that mass exports student data into individual stylized forms.
- Improved data storage practices and employee data comprehension skills through:
 - Spearheading data verification projects, reducing data errors and ambiguity by 20%
 - Introducing strategies for more efficient data storage, archival and retrieval.
 - Used key data modelling techniques to convey complex information to stakeholders.

IT Consultant for SAMAFAL June 2018 – July 2024

- Managed and upgraded the systems and business software used through:
 - Analysing the needs of the client** and their software's performance demands.
 - Isolating key devices that were responsible for business productivity bottlenecks.
 - Balancing the budget provided to the system and software upgrades necessary.
- Trained employees to recognise, prevent and handle cyber threats. This included:
 - Phishing email identification, password safety, handling social engineering attempts.
- Strengthened business cyber security by
 - Monitored workforce information channels for malicious activity.
 - Identified and sourced the best cyber security tools for the client's needs.
 - Handled the security of company backup systems, data and network access.

Freelance Video Editor and Graphic Designer May 2019 – Present

- Created videos which have garnered 50,000 social media impressions.
- Commissioned to design graphics and edit videos for a multitude of streamers.
- Designed weekly tournament graphics
